

## Temporary & Long Term Housing Services

Securing a suitable home is usually a top priority for relocating employees. A number of important questions need to be answered: Which area should I live in? What are the current rental market conditions? Is my budget realistic? How long will it take to find something?

Our involvement in the home finding effort can vary to suit your needs, ranging from a self-help service to full management of the entire process, right through to signing a lease and getting rental payments set up. Whatever levels of support you'd like us to provide, our goal is always the same: Finding a property that delights our clients within budget and without fuss.

We partner with select expert service providers to assist you with your housing needs both for North America and globally. Please contact us for referral to an appropriate provider for your particular relocation situation.
